

AIRFLOW CHAIR

Here is our 21st century interpretation of a klismos design that mixes metal, wood and leather into a highly versatile side chair. A seamless Golden Bronze metal tubular design creates the frame for the seat of the chair. Two thin, wide solid metal legs, along with a rear metal plate, form a truly sculptural base. Classic dark leather strapping around the seat deck provides the base upon which a

plush dark espresso chenille cushion sits. Suspended from its metal frame is the winged outer back of the chair in fumed figured eucalyptus wood, finished to a high sheen in Aged Bourbon. A matching back cushion in the same espresso chenille completes this look that is at once retro and remade.
